Section VI - Reactivity Data

Stability:

Stable.

Conditions to avoid:

Heat, sparks, fire and open flame.

Hazardous decomposition products:

Strong oxidizing agents and peroxides.

Carbon dioxide (CO₂).

Section VII - Spill or Leak Procedures

Spills to be handled in a well ventilated area. Contain spills to prevent spread. Wash spills into retaining area or container. Avoid exposure to sparks, fire, flame or hot metal surfaces. Ventilate enclosed spaces. Avoid breathing vapors. Keep spill from public areas, streams and waterways. Large spills can be taken on sand, clay, earth, floor absorbent and shovelled into containers for disposal.

Disposal by supervised incineration or dispose in compliance with local, state and federal regulations.

Section VIII - Special Protection Information

Proper personal protection apparatus for concentrations above TLV limits:

Self-contained breathing apparatus.

Ventilation:

Local exhaust ventilation. Use adequate ventilation.

Proper engineering controls:

Work area exhaust ventilation. Overhead ventilation.

Personal protective equipment:

Eye glasses, glove, face mask.

Section IX - Special Precautions

Precautions to be taken in handling and storing:

Keep container closed. Keep from heat, sparks and open flame. Use with adequate ventilation.

Precautions:

Avoid breathing vapors. Avoid prolonged or repeated contact with skin. Remove contaminated clothing and wash before reuse. Wash skin with soap and water after contact.
