## II Health Hazard Data

Vapors may cause irritation or the nose, throat, and respiratory tract. Repeated or prolonged exposure to concentrations above the Worker Exposure Limit may cause central nervous system depression (e.g., dizziness, weakness, nausea, headaches and/or unconsciousness).

Small amounts of liquid aspirated into lungs can cause chemical pneumonitis which can be fatal. Liquid may be ingested by eyes and skin.

Solvents similar to this product have caused adverse kidney effects in male rats after prolonged and repeated inhalation exposure. Reports have associated repeated and prolonged occupational exposure to solvents with permanent brain and nervous system damage.

Preexisting eye, skin, and respiratory disorders may be aggravated by exposure to this product.

**FIRST AID:**
- INGESTION: DO NOT INDUCE VOMITING. Call a physician immediately.
- INHALATION: Remove from exposure. If irritation or breathing problems persist, call a physician.
- EYE CONTACT: Flush eyes thoroughly with water for at least 15 minutes, then call a physician.
- SKIN CONTACT: Wash skin with soap and water. If irritation occurs, call a physician.
