

## National Center for Forensic Science

Att: Mary Williams  
PO Box: 162367  
Orlando, FL 32816  
Phone: (407)823-6469  
Fax: (407)823-3162  
Email: mary.williams@ucf.edu

Make payment payable to:  
**University of Central Florida**

University of Central Florida FEID  
59-2924021

### **Ignitable Liquids Reference Collection (ILRC)**

#### Sample Ordering Procedures

Forensic laboratories can use the order form on the reverse side to purchase samples of ignitable liquids listed in the ILRC database: [www.ncfs.org/databases](http://www.ncfs.org/databases). Samples will be shipped in 1/2 dram vials on activated charcoal. Orders for neat liquids may be filled by special request for an additional charge. Completed order forms can be sent to the Center via fax, mail, or email.

#### Payment Policy

Sample cost is \$5.00/sample plus \$ 7.50/shipment for shipping and handling to destinations in the continental US, \$8.00/shipment to Alaska and Hawaii. Contact the Center for shipments to Canada and other international destinations. Payment must be in the form of check or purchase order payable to: University of Central Florida.

#### Shipping Policy

All orders are shipped via UPS-Ground. Orders will be filled within one week of receipt of payment. In transit delivery times for UPS-Ground from Orlando vary from one to seven days. Material Safety Data Sheets (MSDS) are available in the ILRC database.

#### **Disclaimer**

The intent of the database with its associated liquid repository is to provide a searchable resource that allows a laboratory to isolate an ignitable liquid of interest for inclusion into an in-house reference collection. Commercial products are obtained from manufacturers and distributors, and then repackaged for distribution using the product name assigned. The database is designed for screening purposes only; it does not replace ASTM requirements for an in-house reference collection. The classification system parallels the ASTM classification, with some variation, to assist the user's search and to maintain consistency. A laboratory does not need to adopt the ILRC system to successfully use the database.
